

Your Business as you Go

Why you have to use CRM (customers relation management)

- **Control and manage the sales activities and your resources utilization**
Give you control over your sales representatives and clients activities ,monitor how your compar following up your clients , remind you with important checkpoints with your clients , let you study find the history of your clients and your activities
- **Processes quality and compliance**
Gives you insight and statistics about the different clients status, find and response to your clients demand and urgent inquires ,show your clients that you do care ,knowing his history and what he needs
- **Online presences to get the actual and current status of different activities and clients**
Be there all the time , do actions immediately and proactively communicate, less paper work, centralized location for your company activities, speed and simplify the way you used to work
